

JOSEPH MASIKA

📍 Nairobi, Kenya | 📞 +254748114693 | ✉ wamwoka99@gmail.com | 📁 [Portfolio](#)

IT professional with 3+ years bridging technical support and software development, resolving customer reported incidents through code-level, database-level, and configuration-level troubleshooting, while building and maintaining production systems (ERP systems, ISP billing platforms, web applications). Comfortable owning incidents from first contact through root-cause and resolution.

EXPERIENCE

Software Engineer

Veenet Africa | Nairobi - Kenya | 12/2025 - 08/2026

- Designed, developed, and maintained the company's ISP billing system, handling subscriber accounts, invoicing logic, and payment reconciliation, including diagnosing and resolving production billing defects reported by internal/customer teams.
- Built and customized Frappe application modules to support internal business operations, extending standard workflows with custom doctypes, server-side scripts, and API integrations.
- Designed, developed, and maintained the company's official website and other platforms.
- Served as first point of contact for employee-reported technical issues, classifying and resolving requests within SLA, including database-level and code-level fixes.

Software Engineer / Network Support

Fidelity International Hospital | Juba - South Sudan | 06/2024 - 03/2025

- Actively monitored network infrastructure and IT services, providing real-time alerts on network status, failures, and degradation to technical departments within defined SLAs.
- Designed and developed dynamic websites modules with comprehensive server-side logic using the MERN Stack and PHP-Laravel Framework.
- Deliver technical support for end-users, resolving 95% of issues within defined SLAs while managing user accounts, permissions, and system configurations.

NOC Engineer / Technical Support

Ahadi Wireless Corporation - KONNECT | Nairobi | 07/2022 – 06/2024

- Participated in network design and implementation of FTTH and overall GPON architecture in environs around Nairobi, demonstrating advanced knowledge of ISP networks and services.
- Managed Point of Preference (POP) operations: Installation, configuration, optimization and monitoring of application servers and network devices to ensure seamless 24/7 uptime.
- Actively monitored entire network infrastructure (FTTH/GPON) serving 1M+ subscribers using advanced network management systems including Zabbix, Prometheus, and Grafana dashboards.
- Automated network data collection from network devices using Python scripts and Influx DB for enhanced monitoring, real-time decision-making, and operational insights.
- Provided 24/7 professional technical support to wholesale and internal customers across network systems and CRM platforms, maintaining strict adherence to agreed SLAs.

SKILLS

- Systems Administration & Software Development: Windows Server and Linux operating systems administration, and Development (JavaScript, Python, PHP, Node.js and Database Management).
- Network Monitoring & Management Systems: Automated network data collection, analytics and visualization using Python scripts, Zabbix, Prometheus, Grafana, and Influx DB.
- Technical Support & Incident Management: Professional remote technical support, customer service delivery and technical documentation.
- Network Infrastructure Design, Implementation & Administration: - Advanced knowledge of ISP networks and services (FTTH, GPON, DATACOM, fiber optics, and network protocols).
- Experience with IT service management (ITSM), ticketing systems (Jira), and remote support tools (AnyDesk, TeamViewer).
- Strong analytical and decision-making skills - Risk assessment, data analysis, and problem-solving.

EDUCATION

09/2018 - 12/2022

Bachelor of Science in Computer Science | Maseno University - Kisumu

- Grade: Second Class Honors

PROFESSIONAL TRAINING & CERTIFICATIONS

2022

CCNA (Cisco Certified Network Associate) Certification | Netacad Academy

2024

ServiceNow Associate System Administrator | ServiceNow

2025

Kubernetes and Cloud Native Associate | The Linux Foundation

2025 -

Software Engineering | African Leadership Experience - (ALX) | Nairobi, Kenya

REFEREES

MR. MESHACK MAINGI - TEAM LEAD
